

# Texas and Tenaska – Strong Energy Partners

Tenaska’s Texas roots go deep – back to the company’s founding in 1987 and its first power plant constructed in Paris. Today, we are a national energy company with multiple energy interests, including Texas power plants and leading energy marketing companies. Texas is our second home, and we’re proud of our Texas heritage.

## Dallas is Home to Tenaska Regional Offices

Power marketing affiliate Tenaska Power Services Co. is headquartered in Dallas, center of the Dallas-Fort Worth Metroplex. Natural gas marketing affiliate Tenaska Marketing Ventures and Tenaska Energy Solutions have regional offices near Dallas in Las Colinas.

### Tenaska Power Services Co.

- One of the leading providers of energy management services to generation and demand-side customers in the U.S., serving power and asset management customers in Texas and throughout the country
- Manages approximately 21,000 MW of generation in Texas and over 1,300 MW of load
- Proprietary PowerTools Platform® helped customers recover \$4 million

Tenaska Power Services Co. provides electricity marketing and risk management services to industrial and energy companies in Texas and nationwide.

### Tenaska Marketing Ventures

- Among the five largest natural gas marketers in North America since 2013
- Sold or managed 10.7 billion cubic feet (Bcf) of natural gas per day in 2019, a volume equal to 10% of the total U.S./Canadian gas demand
- Ranks first among marketers in natural gas pipeline capacity trading since 2009
- Geographical area covers all of the North America, transporting natural gas on every major pipeline system
- Manages 14.5 Bcf of natural gas storage and is the exclusive natural gas fuel supplier/manager for 2,500 MW of electric generation in Texas

### Tenaska’s Strategic Development & Acquisitions Group

- Developed 10,500 MW of generation, including five power plants totaling more than 3,000 MW capable of serving 3 million Texas homes; Texas plants represent a capital investment of about \$1 billion
- Three plants – two in Texas and one in Oklahoma – recognized for innovative designs enabling simultaneous transmission to the Electric Reliability Council of Texas.

Tenaska’s Strategic Development & Acquisitions Group brings the combined resources of the company to bear when working with customers to meet their power generation needs.

The Paris Cogeneration Station near Paris, Texas, was the first power plant constructed by Tenaska. It began commercial operation in 1989.

**Current Generating Capacity:** 3,000 megawatts (MW), meeting the needs of 3 million Texas homes

**Technical Innovation:** Tenaska’s Frontier and Gateway plants nationally acclaimed for serving both Electric Reliability Council of Texas (ERCOT) and adjacent transmission grid

**Tax Revenue:** In 2019, approximately \$4.3 million in property taxes at the power plants, of which \$3 million supported local school districts; \$1 million in franchise taxes and regulatory assessments at Tenaska, its marketing affiliates and its power plants

**Employment:** More than 350 total Texas employees at power plants and regional offices

**Economic Impact:** Annual employee wages and vendor payments total \$367 million at Tenaska’s regional offices and plant locations

**Committed Citizenship:** Tenaska and its customers contributed more than \$285,000 in scholarships to over 300 college-bound students in Texas since 2000; employees are active community members, volunteering for civic and educational programs

## Tenaska Investment in Texas

New power plant development has been Tenaska's core function since the company's founding in 1987, and Texas has played a big role. Tenaska has developed 19 generating facilities, including its very first in Paris, Texas. Tenaska went on to build four more plants in the great state of Texas, with two still owned and operated by Tenaska affiliates. A plant in Oklahoma also supplies power to Texas' ERCOT market.
